PEONY
"FELIX CROUSSE"

COPYRIGHT 1910

The Leonard and Jones Co.
THE BEST ROSES
IN AMERICA
West Grove, Pa.

The Peony Is King

(see front cover page)

THE Rose with grace may claim the title "Queen of Flowers," but the King of all, by one accord, is the Peony, because it combines more qualities of majestic beauty and gorgeous colors than any other late spring and early summer flower you can get. Because of its hardiness, ease of culture and general satisfaction there is no flower so universally suited to planting almost anywhere.

Therefore, for big dividends in beauty and fragrance, we recommend an investment in this "**Aristocrat of the flower family,**" the **Hardy Herbaceous Peony.**

WE OFFER ONLY CHOICEST VARIETIES, TRUE TO NAME

PLANT PEONIES BECAUSE

1. They are easy to grow, anybody can raise glorious peonies with less trouble than it takes to grow good roses.
2. A peony well established is as permanent a feature in the garden as is desirable in a herbaceous plant.
3. Peonies are perfectly hardy wherever apples can be grown, passing through the most severe winters without injury.
4. The blooms are large, showy, of various forms, and in any shade of color from white to purple.
5. Almost all varieties are fragrant.
6. They are practically free from disease and insects. No spraying or dusting or hand picking of worms is necessary.
7. They are equally successful as a cut flower and for artistic landscape effects. — *Garden Magazine.*

Peonies Make a Gorgeous Mass of Bloom.

AN IMPORTANT POINT

to observe in the planting of Herbaceous Peonies is not to plant too deep. The crowns should be covered with not more than 2 inches of soil. Too deep planting is a frequent cause of peonies not flowering.

HOW, WHERE & WHEN TO PLANT

The Peony will grow well on almost any well drained fertile soil, but it does its best on a rather heavy moist loam.

"Make the ground rich, for the Peony is what gardeners term a 'gross feeder.' The roots also like plenty of water. Plant in the Autumn 2 to 3 feet apart, with the crowns 2 to 3 inches below the surface, and press soil well about the roots.

"A clump well established will last from 20 to 40 years. But it pays to take them up, divide the roots and replant them every 7 or 8 years.

"Oblong beds—3 rows wide, make grand displays—but better still, plant generously along your porch or walk, or in front of shrubbery border."—*Garden Magazine*.

HOW TO GROW BEAUTIFUL HYACINTHS

In the Open Ground

They should be planted in the Fall 6 inches apart each way and 3 to 4 inches deep. Give them slight protection over Winter and they will flash forth in beautiful bright colors early in the Spring and remain in bloom some weeks. Then the Bulbs may be removed in time to set your Summer flowering plants. Or in some soils, Bulbs do well a number of years without lifting or replanting. In such beds for Summer bloom, sow quick-flowering seed of Petunias, Verbenas and Portulacas, etc.

In Pots or Window Boxes

Hyacinths potted in September may be brought to bloom by Christmas, and by successive plantings a succession of bloom may be had until Easter. Plant the Bulb in the pot so that its crown just shows, then when finished set away in a cool dark place for 6 weeks or 2 months for root growth to develop. After this bring gradually to the light, heat and air, and give plenty of water, and you will be well repaid.

In Glasses

All Hyacinths succeed well in water. If Hyacinth glasses are not available use pebbles or shells to keep the Bulbs in place and then set the Bulb so that the lower end is almost but not quite in contact with the water. It is not essential to change the water; a small lump of charcoal in the bottom will serve the same purpose. Put away in a cool dark place till you see the roots developed, then remove by degrees to full light and air.

**FOR INDOOR DECORATION
HYACINTHS ARE INVALUABLE**

Early Flowering Roman Hyacinths

ROMAN HYACINTHS are among the handsomest and most desirable of all Bulbs for early Winter flowering in the House or Conservatory. They begin to bloom very quickly and throw up great masses of sweet and lovely flowers almost before other bulbs get started. They are easily grown in pots or boxes; require no special treatment and are absolutely sure to bloom. Though recommended for House Culture they are quite hardy, and when planted in open ground will make an elegant display of lovely flowers very early in the Spring.

Late or May Flowering Hardy Garden Tulips

These Tulips are quite distinct from the early flowering kinds—coming later they extend the blooming season two to three weeks longer, and are usually at their best about Decoration Day. They are all single. They are extremely hardy and therefore excellent for planting in the herbaceous border, among the shrubbery or for naturalizing in any place where they can remain undisturbed and bloom regularly for years. Splendid for bouquets because of their durable flowers and long stems. Set these bulbs 4 inches deep.

True Chinese Sacred Lily

THE WATER FAIRY FLOWER OR "SHIN SIN FAR"—OR CHINESE "JOSS FLOWER"

Chinese Sacred Lily or "Joss Flower"—growing in pebbles and water

The Great Chinese Sacred Lily is still one of the most popular Winter-blooming bulbs we have. They grow very easily and are sure to bloom quickly; they like moderate moisture and plenty of light and heat. They grow nicely in pots of ordinary soil, but the easiest and quickest way to bloom them is in a bowl of water with a few pebbles to hold the bulbs in place. The bulbs are large, and each one sends up from five to twelve flower stems bearing great clusters of large pure white wax-like blossoms, with yellow centers and deliciously fragrant. Some are single and others double, but all equally beautiful, and they bloom so quickly and abundantly they are in great demand everywhere. They continue to bloom a long time, and by planting at different times, a few weeks apart, you can have flowers all Winter and Spring. Ours are the Genuine Chinese Sacred Lily grown in China.

Price, first size quick-blooming bulbs, 12c. each; 3 for 35c.; \$1.25 per doz.; \$9.00 per 100, delivered free in U. S. A.

Among the pretty flowers of Spring, none is greeted with a heartier welcome than the Crocus. Ours are the Improved Strains, noted for large flowers and brightest colors. They are entirely hardy, and like a rich dry soil and sunny location. They are suitable for planting in beds and borders, also for edging in ribbon lines of any desired color, for planting in the grass in lawn or yard. Crocus are also very highly valued for House Culture. They bloom very quickly and are so cheap that all can afford to have them.

Plant the crocus 2½ inches deep in the Autumn. They look especially well scattered over the lawn as in this picture, and make their glorious show before the grass starts growing.

"CONSIDER THE LILIES"

The True Bermuda Easter Lily

(LILIAM HARRISII)

Bermuda Easter Lily

This is one of the grandest and most beautiful lilies ever seen, and the best of all for Winter flowering in pots; it grows easily and is sure to bloom. The flowers are pure snow-white, very large and fragrant, and borne in splendid clusters, six or eight at a time. Vast numbers of these splendid lilies are grown for church and house decorations every year. Plant in a pot or box which is at least six inches deep and well drained; good turfy soil with a little old, well-rotted manure is best; the bulb should be covered about one inch deep; firm the earth well around it, water thoroughly and set away in a cool place three weeks or more till the roots begin to start, then bring to the light—the window of an ordinary living room is about right. They require moderate heat, with plenty of sunshine and water, and should *bloom about three months from time of planting*. Our Easter Lily Bulbs are of the very best quality and warranted to give satisfaction. We offer them in 3 sizes. *Ready in August*.

In house or conservatory a half dozen roots in a 4-inch pot, kept cool awhile and then given light and moisture, will soon produce an abundance of lovely fragrant flowers. Price, strong flowering roots, delivered free in U. S., 3 for 15c.; 12 for 50c.; 25 roots, 1 bundle, 75c.; 100 roots, \$2.00.

YOUR INTERESTS AND OURS WILL BE MUTUALLY SERVED

If you order one or more of our self-watering flower boxes. Their chief merit lies in the fact that plants grow and thrive better in them and blooms will be larger and foliage heavier than in the ordinary surface watered boxes.

The boxes are provided with a self-watering device which renders attention unnecessary except at intervals of from 10 to 20

days. Through the tube in corner water is poured into the reservoir (e) underneath the false bottom (d) which supports the soil (b).

Sponges (cc) touch the extreme bottom of box and extend upward into the soil in which the flowers are planted, thus

AUTUMN IS AN EXCELLENT TIME FOR SEEDING DOWN NEW LAWNS OR RENOVATING OLD ONES

USE C. & J. VELVET GREEN LAWN GRASS SEED

Unexcelled by any for producing a smooth, even, velvety-green sward that will withstand drought and hard usage, and always make a handsome appearance. In seeding down a lawn or grass plot three things are necessary to insure success: First, to prepare the ground so as to have a fine, smooth seed bed; second, to put on plenty of seed; never less, but rather more, than the directions call for; third, to start the lawn-mower as soon as growth is tall enough to catch the machine, and keep it mowed off close till the grass has time to start and become well established. The seed should be lightly raked in and finished with a roller. Apply any good commercial fertilizer as a top dressing when needed. One quart of seed is enough for three hundred square feet (fifteen by twenty feet), or at the rate of five bushels to the acre. Keep the lawn neatly mowed, and you will have a clean, even growth of fresh, lively green.

Price by mail, postpaid, 25c. per quart; two quarts for 45c.; in bulk, purchaser paying express charges, \$1.50 per peck; \$5.00 per bushel of 20 lbs.

New Emerald Feather Asparagus

(*ASPARAGUS SPRENGERII*)

This is undoubtedly one of the handsomest and most valuable evergreen trailing plants for the house and conservatory ever introduced. It is especially valuable for pots, vases, baskets, etc., covering all with its beautiful sprays of lovely green feathery foliage, which can be cut freely and is very useful for bouquets, wreaths, and all kinds of floral decorations. It makes a charming ornamental plant for the window or conservatory in Winter, and is equally valuable for vases, baskets, porch boxes in Summer. It is a strong vigorous plant, very easily grown, requires but little care and keeps on growing, fresh and green, year after year. Price, 15c., 20c. and 25c. each; \$1.50, \$2.00 and \$2.50 per doz., postpaid. Extra size from 5 and 6-inch pots, 35c. and 50c. each by express.

Emerald Feather Asparagus

Asparagus Plumosa

Climbing Lace Fern

Asparagus Plumosa

A finer and more delicate plant than the Sprengerii, but hardy and easily grown; very satisfactory for window and house culture; an extremely graceful window climber, bright, green, feathery foliage, as fine as the finest silk or lace. The fronds retain their freshness for weeks when cut, and are greatly admired for floral decorations. An exceedingly beautiful plant for house and conservatory, and will thrive nicely in the temperature of an ordinary living room. Entirely unequalled for the grace and beauty of its lovely spray-like fronds.

Price, nice thrifty plants, 15c. and 20c. each; \$1.50 and \$2.00 per doz., postpaid; larger sizes, 40c. and 50c. each, by express.

Hardy Perennials—Old Fashioned Garden Flowers

Autumn is the best time in the year for planting some hardy perennials. They get well established during the Winter and are ready to start growth with the first sign of Spring. They are perfectly hardy and last for years, and thus will save you time, labor and expense, and afford a variety and succession of bloom unequalled.

Use Our New Self-Watering Flower Boxes For Your Winter Window Gardens

Water Once

in Two Weeks

THE Illinois Self-Watering Flower Boxes "Care for your plants while you visit your friends" for a week or more at a time if you like. They do not rot out or spoil your furniture, but are always neat and clean. They save you time and trouble. But the main point in their favor is that **flowers flourish in them.** They get the water at the roots, just where it is needed, and the surface soil instead of becoming baked and hard remains free to the air, (as explained on page 19). They are well made of strong galvanized sheet iron, so carefully pressed, corrugated and soldered that leakage is impossible, (see our guarantee).

They are painted a pleasing green, and for indoors and outdoors highly ornamental.
